LOCALLY ADVANCED PROSTATE CANCER

- 1- Is surgery always the standard? Arnaud Villers (France)
- 2- Alternatives in radiation treatments Robson Ferrigno (SFBO)
- 3- Round table: Debate and Consensus Angeles Rovirosa (ALATRO)

Is surgery always the standard?

1- Is surgery always the standard?

Why?

When?

2- Surgery without MRI?

3- Are other diagnostic images needed?

Alternatives in radiation treatments

- 1- 3D: 4-pelvic fields/conformational + Conformational boost
- 2- Pelvic 4-pelvic fields/conformational + IMRT boost
- 3- Pelvic IMRT + IMRT boost (consecutive/integrated)
- 3- IMRT + Brachy Boost
- 4- IMRT + other kinds of prostate boost.....

IMRT for every RT patient ?

100

CANCER PATIENTS TREATED WITH RT

50

TREATED WITH PALLIATIVE INTENT

20 – 30

“CONVENTIONAL” TREATMENT GOOD ENOUGH

30 – 20 % of all RT patients pool can be justifiably treated with IMRT
